

# Addiction and Recovery Support

## Challenges

- Taming the opioid-heroin epidemic and implementing long-term coordination of behavior change
- 80,000 deaths per year; 500,000+ overdoses; tremendous amount of crime, and harm to families

## Barriers

- Overcoming stigma and flagging dangers
- Providing information to reduce misinformation
- Finding local complete recovery programs
- Extending short programs with limited follow-up

## The LifePulse360 Solution

- The LifePulse360 care-coordination framework with special agents and action plans addresses not only health but also arrange for human services.

## For the Patient-Consumers

- Providing action and treatment reminders
- Defining hope for the future
- Implementing personalized treatment tracking
- Providing alternatives to the drug culture vs. merely pressure to quit

## For Care Coordinators

- Providing problem solving for action plans
- Providing new and timely information on the latest recovery treatments
- Partnering for integrated care

## For Providers and Community Partners

- Providing rapid treatment support and education
- Providing close integration between care coordinators and their patients
- Supporting coordinators to enable them to track data, bridge the information divide between the provider and patient and to build trust

## Key Goals

- Timely response to emerging threats
- Turn from episodic response to communities that care
- Use collaborative technologies and agents to leverage limited resources

## Ultimate Goal

- Automate care coordination framework providing a rainbow of services with no gaps!
