

Coronavirus First: Community that Cares

The wave of the pandemic is here and it needs to be addressed at a county and community ground level where we all may become patients but some will be critically ill. LifePulse360 personalized and community-based care coordination has been rapidly extended to fit at the county and neighborhood level. It is shown in the figure above.

Bringing Resources together at the county level and pressure on the local Hospitals and calling on Primary Care Providers handling of “many calls”:

- Provide a Smart Coronavirus Screening and automated scheduling of Coronavirus Test Centers (as test availability and test processing improvements)
- Reduce the time consuming screening calls that overwhelm Primary Care Providers
- Track the improving or worsening of patients coronavirus symptoms

LifePulse360 has added the following features:

- Support Screening Rules for COVID-19 Characteristics
- Provide Instant Messages to setup Patient Portal Access
- Schedule appointment with Coronavirus Test Centers
- Provide access to trusted coronavirus information
- Collaborate with Care Coordinator on specific pre-existing conditions

- Follow COVID-19 direct medical concerns along with other indirect concerns from medication management to food, housing, bills, and loneliness and rising anxiety
- Monitor the conditions of those being isolated- daily journals and regular check-in calls or interactions
- Leverage all the other capabilities of LifePulse360 care coordination such as medication adherence management, referrals, treatment and action plans and smart reminders can be used
- Support Admin functions to set up typical county resources
- Provide privacy protected encrypted files for each individual
- Support health information gathering and sharing based on patient authorization

Easy Set and Low Cost with Usage Pricing

- It only takes hours to set up your county
