

Key Feature

Value

Personalized patient care plans based on concerns, symptoms and integrated treatments

- Patients and providers together define their needs
- Patients track actions and implement changes

Increases attention given to patients by the provider and support team.

Each portal provides a view of the health and human services, events and future actions

- Integrated event journey
- Coordination across boundaries
- Local and national resources

Provides a life narrative and perspective for future plan.

Support for care coordination

- Outreach
- Change notes
- Collect events of personal narratives
- Mobile
- Directory of community resources
- Concerns and concern interaction
- Feedback forms
- Instant messages

*From no care coordination tools to an integrated environment.
Offloads some work of provider.
Establishes comprehensive guidance for high-risk patients.*

Patients / caregivers

- Retain control of their information in a style they can understand
- Holistic approach driven by concerns
- Medication management
- Answers to questions and feedback

Patient in control and engaged with understandable actions.

Providers

- Referral 360 (Refer with full feedback)
 - All states and counties
 - Search by name or address
 - Can be updated by local management
- Creates treatment plan that patients can follow
- Supports office practices, both large and small, along with field counselors

Providers, with the help of care coordinators, stay in close touch with even the most complex patients.

Admin

- Manage accounts
- Reviews and adds community resources
- Manages interfaces

*Built for change and integration
Personalized record keeping and value-based reporting.*

A platform that solves one of the biggest issues in healthcare, missing information.

LifePulse360 manages the complexity of good healthcare with smart tools for providers, patients, and care coordinators.

LifePulse360 is a central hub of secure patient health records and behavioral health resources to be accessed by patients, care coordinators and providers.

Patient Benefits

- Communicate directly with your provider and care coordinator.
- Keep track of your appointments.
- Access local resources for human health services.
- Manage your medications.
- Track your treatments.

LifePulse360 can be used by anyone but it is especially valuable for patients who are disabled or have behavioral health issues such as substance abuse and suicide. It provides a mechanism to communicate rapidly and securely. It can be used for a short period of time while recovering from a car accident or major health episode and it can be used over a lifetime to coordinate all your health information in one place.

Care Coordinator Benefits

- Centralize all pertinent information from multiple sources in one location.
- Keep a record of patient events.
- Manage appointments.
- Track treatment plans and progress.

Sometimes called a case manager, nurse navigator or peer counselor, a care coordinator can greatly increase positive outcomes for patients with LifePulse360. It allows for a 360° view of a patient's health information, including input from providers and patients themselves. It also allows easy access to local providers and community resources within a searchable data base.

Provider Benefits

- Save time tracking down information.
- Manage more patients with smart monitoring.
- Connect patients with the care and resources they need.

LifePulse360 integrates all the patient's health and community services information together. It uses smart technology to create alerts, reminders and other communications. It improves patient compliance with treatment plans and takes an holistic approach to the patient's concerns.

Who pays for it?

Your healthcare provider, community health center or your insurance provider should pay for access to LifePulse360. LifePulse360 is designed in accordance with Medicare's value-based payment method.

Security and Privacy

Only the patient and those designated by the patient can access sensitive medical information. LifePulse360 creates security, privacy and consent protection via Amazon Web Services (AWS) cloud technology.

How is LifePulse360 Different?

- It reduces complexity and confusion.
- It shifts focus to the patient.
- It reduces the high cost for the patient as well as the insurance provider.
- It links to human services, volunteer organizations and family care givers.
- It delivers information to patients of different literacy levels.
- It introduces smart agent-based technology without needing massive workflow change.
- It interfaces with a range of devices including mobile phones and tablets.

LifePulse360 is a platform that solves one of the biggest issues affecting healthcare - missing information.
